Letter of Recommendation

31 October 2025
Graduate Research School
Research Training Program (RTP) Scholarship Committee
The University of Queensland (UQ)
St Lucia, Brisbane, QLD 4072, Australia

Dear Admissions Committee

It is my pleasure to write in support of the application of Mr. Ian Harris for the Research Training Program (RTP) Scholarship to pursue his PhD at The University of Queensland. Harris has been an exemplary student in my *Animal Nutrition and Metabolism* class at Bangladesh Agricultural University (BAU). In my experience, he ranks within the top 5% of all Animal Science students I have taught and supervised over the past five years. I have observed his strong academic performance, integrity, and dedication to learning and research.

Harris has demonstrated outstanding academic performance throughout his studies. He consistently ranked among the top students in his class and showed exceptional mastery of subjects related to poultry nutrition, metabolism, and experimental design. His strong grasp of quantitative analysis, critical thinking, and problem-solving has been evident in both coursework and research activities, reflecting his commitment to academic excellence.

Harris possesses strong research and analytical skills, with proficiency in statistical analysis using R and SAS. His work on amino acid supplementation in broiler diets, published in *Livestock Science*, highlights his ability to design experiments, interpret data, and communicate scientific findings effectively. His integration of metabolic pathway insights with nutritional data demonstrates both technical competence and scientific depth, making him a promising candidate for advanced research in poultry nutrition and metabolism.

Harris works well both independently and as part of a team, showing initiative and a collaborative spirit in every project. His professionalism, humility, and willingness to assist others make him a valued member of any academic or research environment. He consistently demonstrates integrity and a positive attitude, contributing to a productive and supportive atmosphere in both the classroom and laboratory.

In conclusion, I am pleased to give Mr. Ian Harris my highest recommendation for his RTP Scholarship. Please feel free to contact me if you require any additional information or clarification.

Sincerely,
(add handwritten signature)
